AGRICULTURE OF THE REPUBLIC OF BELARUS

statistical book

MINSK

2016

EDITORIAL BOARD:

I.V. Medvedeva – Chairman

I.S. Kangro, Z.N. Vasilevskaya, E.I. Kukharevich, O.A. Dovernar,
E.M. Palkovskaya, A.I. Borichevskiy, Z.V. Yakubovskaya

The book presents data on the agricultural development of the country in 2010-2015. Selected indicators refer to a lengthier period.

Intended for higher managerial personnel, government bodies, financial and economic departments of organisations, research community, teaching staff, postgraduates and students of higher education institutions and other interested users.

FOREWORD

The statistical book contains main indicators characterizing the agricultural sector of the Republic of Belarus for 2010-2015. Selected data are given for longer period of time.

The statistical book is prepared on the basis of data of overall and sampling state statistical observations, and also of administrative data.

The statistical book includes data on main indicators of agricultural development: agricultural production, production structure of main agricultural products, per capita agricultural production etc.

The substantial place is given to crop growing and animal husbandry indicators. This publication includes data on agricultural area and its structure by types of farms; area under crops, gross harvest, yield capacity of agricultural crops and perennial plantations. There are also included data on livestock and poultry population, production of main animal husbandry products and other data.

Special part of the publication includes information on agricultural facilities: data on fixed capital investment, production, availability and supply of agricultural machinery.

There are also data on production of basic products of food industry, foreign trade in food goods, consumption of basic food products and other.

The book also includes data characterizing financial results of organisations, average prices of agricultural products sold.

The data are presented at the national and regional levels with selected indicators broken down by district.

In several cases the 2015 data are preliminary and are subject to revision in further issues.

Explanation of symbols:

- not applicable
- 0,0 negligible magnitude
- ... data not available

In several cases insignificant discrepancies between the total and the sum of data is to be assigned to data rounding.

Relative ratios are calculated on the basis of absolute figures expressed in smaller units than those given in tables.

CONTENTS

	Pg.
1. Main socio-economic indicators for years 2010-2015	
1.1. Main socio-economic indicators	12
2. Characteristics of economic entities	
2.1. Agricultural organisations and private farms by region	15
2.2. Agricultural organisations by legal organisational form.	16
2.3. Agricultural organisations by ownership	17
3. Labour resources	
3.1. Payroll number of employees in organisations by region	18
3.2. Nominal gross average monthly wages and salaries of employees by region	19
3.3. Real wages and salaries of employees by region	20
3.4. Graduates from secondary specialised and higher education programmes with specialty in "Agriculture".	21
3.5. Occupational injuries in agricultural organisations.	21
4. Main indicators of agriculture	
4.1. Agricultural output by type of farm.	23
4.2. Structure of agricultural output by type of farm.	24
4.3. Structure of agricultural output by type of output and type of farm.	24
4.4. Indices of agricultural output	25
4.5. Indices of crop output.	25
4.6. Indices of animal output.	26
4.7. Structure of agricultural output by type in farms of all types	26
4.8. Structure of production of basic agricultural products by type of farm	27
4.9. Indices of agricultural output in farms of all types by region	28
4.10. Agricultural production per capita.	29
4.11. Main indicators of agricultural organisations activity.	30
4.12. Main indicators of private (peasant) farms activity.	31
4.13. Main indicators of household activities.	32
5. Physical Resources of agriculture	
5.1. Manufacture of basic agricultural machinery	34
5.2. Number of basic agricultural machinery and equipment in agricultural organisations	35
5.3. Number of basic agricultural machinery and equipment in agricultural organisations by region	36
5.4. Availability of tractors and combine harvesters in agricultural organisations	38

	Pg.
5.5. Production of mineral fertilizers	38
5.6. Application of mineral fertilizers in agricultural organisations	39
5.7. Application of mineral fertilizers in agricultural organisations by region	40
5.8. Application of organic fertilizers in agricultural organisations	44
5.9. Application of mineral and organic fertilizers per hectare of ploughland in agricultural organisations (graph)	44
5.10. Application of organic fertilizers in agricultural organisations by region.	45
5.11. Liming of soils in agricultural organisations	46
5.12. Power capacity in agricultural organisations.	46
5.13. Fixed capital investment in agriculture.	46
5.14. Fixed capital investment in agriculture by source of funding	47
5.15. Commissioning of production facilities	48
5.16. Construction of commercial dairy farms.	48
 6. Crop growing 	
6.1. Agricultural land by land user	49
6.2. Structure of agricultural land by land user	50
6.3. Reclaimed land	51
6.4. Fruit gardening and summer house (dacha) construction	51
6.5. Vegetable gardening	52
6.6. Sown area under basic agricultural crops in farms of all types	52
6.7. Sown area under agricultural crops by crop and type of farm.	53
6.8. Structure of sown area under agricultural crops by crop and type of farm	56
6.9. Sown area under grains and legumes in farms of all types	59
6.10. Area of fruit and berries plantations by type of farm	59
6.11. Sown area under agricultural crops on reclaimed land in agricultural organisations.	60
6.12. Total sown area under agricultural crops by type of farm by region	61
6.13. Sown area under grains and legumes by type of farm by region	62
6.14. Sown area under rape by type of farm by region	63
6.15. Sown area under sugar beets by type of farm by region.	63
6.16. Sown area under flax by type of farm by region.	64
6.17. Sown area under potatoes by type of farm by region.	65
6.18. Sown area under vegetables by type of farm by region.	66
6.19. Sown area under forage crops by type of farm by region.	67
6.20. Sown area under basic agricultural crops in agricultural organisations by district.	68
6.21. Gross harvest of basic agricultural crops	80
6.22. Gross harvest of grains and legumes by type	81

	Pg.
6.23. Yield capacity of basic agricultural crops	82
6.24. Yield capacity of grains and legumes by type	83
6.25. Gross harvest of agricultural crops by crop and type of farm	84
6.26. Yield capacity of agricultural crops by type of farm	86
6.27. Gross harvest of fruits and berries by type of farm	89
6.28. Yield capacity of fruits and berries by type of farm	90
6.29. Gross harvest and yield capacity of grains and legumes in agricultural organisations (graph)	91
6.30. Gross harvest and yield capacity of potatoes in agricultural organisations (graph)	91
6.31. Gross harvest and yield capacity of flax fibre in agricultural organisations (graph)	92
6.32. Gross harvest and yield capacity of sugar beets in agricultural organisations (graph)	92
6.33. Gross harvest and yield capacity of vegetables in agricultural organisations (graph)	93
6.34. Gross harvest and yield capacity of rape in agricultural organisations (graph)	93
6.35. Gross harvest and yield capacity of agricultural crops on reclaimed land in agricultural organisations	94
6.36. Gross harvest of grains and legumes by type of farm by region	95
6.37. Gross harvest of rape by type of farm by region	96
6.38. Gross harvest of sugar beets by type of farm by region	96
6.39. Gross harvest of flax fibre by type of farm by region	97
6.40. Gross harvest of potatoes by type of farm by region	98
6.41. Gross harvest of vegetables by type of farm by region	99
6.42. Gross harvest of fruits and berries by type of farm by region	100
6.43. Yield capacity of grains and legumes by type of farm by region	101
6.44. Yield capacity of rape by type of farm by region	102
6.45. Yield capacity of sugar beets by type of farm by region	102
6.46. Yield capacity of flax fibre by type of farm by region	103
6.47. Yield capacity of potatoes by type of farm by region	104
6.48. Yield capacity of vegetables by type of farm by region	105
6.49. Yield capacity of fruit and berries by type of farm by region	106
6.50. Gross harvest and yield capacity of basic agricultural crops in agricultural organisations by district	107
7. Animal husbandry	
7.1. Livestock population in farms of all types	124
7.2. Basic livestock population by type of farm	125
7.3. Structure of livestock population by type of farm	126
7.4. Number of poultry, rabbits, and bee families by type of farm	127
7.5. Number of basic livestock and poultry by type of farm by region	128

	Pg.
7.6. Number of basic livestock and poultry in agricultural organisations by district	134
7.7. Production of basic animal products in farms of all types	144
7.8. Production of basic animal products by type of farm	145
7.9. Structure of production of basic animal products by type of farm	146
7.10. Sales of livestock and poultry for slaughter by livestock type and type of farm	147
7.11. Structure of sales of livestock and poultry by livestock type and type of farm	148
7.12. Sales of livestock and poultry for slaughter by type of farm by region	149
7.13. Production of milk by type of farm by region	151
7.14. Production of eggs by type of farm by region	152
7.15. Production of wool (physical weight) by type of farm by region	153
7.16. Sales of livestock and poultry for slaughter in agricultural organisations by district . . .	154
7.17. Production of milk in agricultural organisations by district	158
7.18. Production of milk and average milk yield per cow in agricultural organisations (graph)	162
7.19. Average milk yield per cow by type of farm	162
7.20. Average milk yield per cow by type of farm by region	163
7.21. Average milk yield per cow in agricultural organisations by district	164
8. Financial standing and prices	
8.1. Main financial indicators of organisations in agriculture	170
8.2. Status of accounts of organisations in agriculture.	171
8.3. Main financial indicators of agricultural organisations by region	173
8.4. Status of accounts of agricultural organisations by region	176
8.5. Profitability of products sold by agricultural organisations	178
8.6. Average agricultural producer prices	179
8.7. Agricultural producer price indices	179
8.8. Price parity index of industrial and agricultural products	179
9. Processing of agricultural products	
9.1. Main indicators of organisations with economic activity in “Manufacture of food products, including beverages, and tobacco”	181
9.2. Structure of production of food products, including beverages, and tobacco	181
9.3. Commissioning of production capacities.	182
9.4. Production of basic food products including beverages	182
10. Foreign economic activity	
10.1. Volume of foreign trade in agricultural and food products	183
10.2. Share of agricultural and food products in the volume of foreign trade in goods of the Republic of Belarus (graph)	184

	Pg.
10.3. Exports of food products	185
10.4. Imports of food products to the Republic of Belarus	186
10.5. Imports of selected non-food goods to the Republic of Belarus	189
11. Food balance sheets	
11.1. Level of self-sufficiency in basic agricultural products.	190
11.2. Supply and use of meat and meat products	191
11.3. Supply and use of milk and dairy products	191
11.4. Supply and use of eggs and egg products	192
11.5. Supply and use of fish and fish products	192
11.6. Supply and use of potatoes and potato products.	193
11.7. Supply and use of vegetables and cucurbits and their conversion products	193
11.8. Supply and use of fruits and berries and their conversion products	194
11.9. Consumption of basic food products per capita	194
12.1. International comparisons Belarus and CIS countries	
12.1.1. Indices of agricultural production	195
12.1.2. Production of grains and legumes	195
12.1.3. Per capita production of grains and legumes	196
12.1.4. Yield capacity of grains and legumes	196
12.1.5. Production of sugar beets	197
12.1.6. Per capita production of sugar beets	197
12.1.7. Production of potatoes	198
12.1.8. Per capita production of potatoes	198
12.1.9. Yield capacity of potatoes	198
12.1.10. Production of vegetables	199
12.1.11. Per capita production of vegetables	199
12.1.12. Production of fruits and berries (excluding citrus fruit)	200
12.1.13. Per capita production of fruits and berries (excluding citrus fruit)	200
12.1.14. Cattle population.	201
12.1.15. Cow population.	201
12.1.16. Pig population.	202
12.1.17. Sheep and goat population.	202
12.1.18. Production of livestock and poultry for slaughter	203
12.1.19. Per capita production of livestock and poultry for slaughter	203

	Pg.
12.1.20. Production of milk	204
12.1.21. Per capita production of milk	204
12.1.22. Production of eggs	205
12.1.23. Per capita production of eggs	205
12.1.24. Consumption of basic food products per capita.	206
12.2. Belarus and countries of the world	
12.2.1. Rank of the Republic of Belarus in the world production of selected agricultural products.	208
12.2.2. Indices of agricultural production	208
12.2.3. Production of selected agricultural crops	209
12.2.4. Yield capacity of selected agricultural crops	211
12.2.5. Livestock and poultry population	213
13. Services in crop growing and animal husbandry	
13.1. Main indicators of organisations providing services in crop-growing and animal husbandry.	215
13.2. Organisations providing services in crop-growing and animal husbandry by region and Minsk city	216
13.3. Main indicators of organisations providing services in crop-growing and animal husbandry by region and Minsk city.	217
13.4. Main financial indicators of organisations providing services in crop-growing and animal husbandry.	218
13.5. Status of accounts of organisations providing services in crop-growing and animal husbandry.	218
13.6. Main financial indicators of organisations providing services in crop-growing and animal husbandry by region and Minsk city.	219
13.7. Status of accounts of organisations providing services in crop-growing and animal husbandry by region and Minsk city.	222

1. MAIN SOCIO-ECONOMIC INDICATORS FOR 2010-2015

Current population estimates as of January 1 are based on the results of the last population census plus the annual number of births and arrivals to a given area and minus the annual number of deaths and departures from a given area. The estimates take into account increase or decrease of population in selected areas due to the changes of their boundaries, as well as changes in urban and rural population caused by changes in administrative and territorial system of the Republic of Belarus i.e. changes of a settlement status (rural-to-urban or urban-to-rural transformation under legislative acts).

Resident population refers to individuals who permanently reside in a given area as well as foreign nationals and stateless persons who temporarily reside in a given area for a year or more.

The population is classified into urban and rural according to the place of residence. In this respect, urban settlements refer to localities that were granted an urban status in compliance with the legislation (cities, urban, industrial and resort settlements). All other settlements are rural.

Payroll number of employees includes employees who worked under employment agreements (contracts) and performed permanent, temporary or seasonal work for a day or more. This includes both actually working employees and persons temporarily absent from work for any reason (annual leave, a leave initiated by employer, temporary disability, or other reason). External multiple job holders and civil-law contractors are not included.

Average annual payroll number of employees is a sum of average monthly number of employees for all months ended from the beginning of the year divided by 12. Average annual payroll number of employees does not include employees on maternity leave, on a leave connected with the adoption of a child under 3 months of age, and a child care leave up to the age of three years.

Nominal gross average monthly wages and salaries are calculated by dividing the gross payroll, including income tax and compulsory insurance contributions of employees, by the average payroll number of employees used for the calculation of the average wages and salaries and by the number of months in the period.

Real wages and salaries is a relative statistical measure characterizing the purchasing power of wages and salaries in the reference period in connection with the changes in prices of consumer goods and services compared with the base period. It is calculated by dividing the nominal gross wage index by the consumer price index for the same time period.

Gross Domestic Product (GDP) reflects the value of goods and services produced in the country by all economic activities and intended for final consumption, capital formation and net exports. GDP by production approach is calculated as the sum of gross values added by economic activities and net taxes on products.

Gross value added reflects the difference between output and intermediate consumption calculated by economic activities.

Fixed capital investment reflects the total costs invested in the acquisition, reproduction and creation of new fixed assets.

Labour productivity in agriculture per employee is measured as a ratio of the output produced in agricultural organisations at current prices to the average payroll number of employees engaged in agricultural production. The index of labour productivity is calculated as a ratio of the index of agricultural output at constant prices to the index of changes in the average payroll number of employees engaged in agricultural production.

1. MAIN SOCIO-ECONOMIC INDICATORS FOR 2010-2015

1.1. Main socio-economic indicators

	2010	2011	2012	2013	2014	2015

2. CHARACTERISTICS OF ECONOMIC ENTITIES

Agricultural organisations and private (peasant) farms include active legal entities (except local kind-of-activity units) with the principal economic activity in agriculture (according to the Nationwide Classification of the Republic of Belarus OKRB 005-2006 "Kinds of economic activity" groups 011 "Growing of crops", 012 "Farming of animals", and 013 "Growing of crops combined with farming of animals (mixed farming)").

4. MAIN INDICATORS OF AGRICULTURE

Agricultural output is the total value of material goods produced in the sector both for sale and for internal consumption. Agricultural output includes the value of animal husbandry and crop-growing products, and change in the value of work-in-progress in crop growing.

Crop growing output is the value of raw products obtained from the harvest of the reference year (cereals and legumes, oil seeds, potatoes, sugar beets, flax fibre, forage crops, vegetables, fruits and berries, planting stock (nursery plants), flower products, mushrooms, etc.), value of planting young perennial plantations, changes in the value of work-in-progress in crop growing (costs associated with work done in the reference year for the harvest of the next year (sowing of winter crops, fall-ploughing, etc.)).

Animal husbandry output is the value of raw products obtained as a result of raising and economic use of farm animals and poultry (milk, eggs, honey, wool, etc.), expenses related to raising of farm animals and poultry (crop, growth and weight gain), the value of young stock sold for breeding.

Index of agricultural output is a relative statistical measure reflecting changes in agricultural output in the periods compared (in constant prices).

Farms of all types means all groups of agricultural producers. They include:

agricultural organisations defined as legal entities (excluding private farms), their subdivisions with separate balance and main and/ or secondary economic activity in agriculture, excluding provision of services in crop growing and animal husbandry (according to the Nationwide Classification of the Republic of Belarus OKRB 005-2006 "Kinds of economic activity", groups 011 "Growing of crops", 012 "Farming of animals", and 013 " Growing of crops combined with farming of animals (mixed farming)");

private farms;

household subsidiary plots which are personal subsidiary plots of permanent rural residents, subsidiary plots of individuals, engaged in agricultural production using land plots allotted for construction and/ or maintenance of single-family, terraced residential houses, collective gardening or dacha (summer house) construction.

5. PHYSICAL RESOURCES OF AGRICULTURE

Availability of specific agricultural machinery in agricultural organisations is a ratio of the number of related machinery as of the end of the year to the sown area (ploughland) under corresponding agricultural crops. Calculated per 1000 hectares of sown area (plough land).

Load rate on agricultural machinery is a ratio of plough land or sown area of agricultural crops to the number of agricultural machinery. Calculated per unit of corresponding type of agricultural machinery.

Power capacity in agricultural organisations is the total capacity of all energy sources supporting production process – mechanical and electric motors, electricity generating plants, and animal draught power.

Power supplied per worker in agricultural organisations is a ratio of total power capacities to the average annual number of workers engaged in agricultural production.

Power supply in agricultural organisations is the ratio of total power capacities to sown area of agricultural crops. Calculated per 100 hectares of sown area.

Fixed capital investment are total costs invested in the acquisition, reproduction and creation of new fixed assets.

5.1. Manufacture of basic agricultural machinery

5.4. Availability of tractors and combine harvesters in agricultural organisations

(end of year)

	2010	2011	2012	2013	2014	2015
Tractors per 1000 hectares of plough land, units	10	10	9	9	9	9
Plough land per tractor, hectares	100	104	106	109	117	113
Combine harvesters per 1000 hectares under corresponding crops, units:						
grain harvesters	5	5	5	5	5	5
potato harvesters	23	20	22	26	24	22
flax harvesters	16	12	12	13	14	13
beet harvesters	8	7	6	5	4	4
Area under corresponding crops per combine harvester, hectares:						
grain harvester	203	194	201	197	216	211
potato harvester	43	49	46	38	41	45
flax harvester	64	80	83	78	71	80
beet harvester	120	146	173	203	244	261
Per 100 tractors, units:						
ploughs	28	28	27	26	25	23
cultivators	20	19	19	18	17	16
sowing machines	19	18	18	17	16	14
rakes	11	11	11	12	12	11
mowing machines	19	18	18	19	19	18

5.5. Production of mineral fertilizers

(thousand tonnes)

	2010	2011	2012	2013	2014	2015
Total mineral fertilizers (in terms of 100 % nutrient content)	6 176	6 288	5 859	5 279	7 368	7 508
of which:						
nitrogenous	761	798	814	833	842	861
phosphorous	192	185	214	203	186	179
potassium	5 223	5 306	4 831	4 243	6 340	6 468

5.6. Application of mineral fertilizers in agricultural organisations

(in terms of 100% content of nutrients)

	2010	2011	2012	2013	2014	2015
Under agricultural crops, perennial plantations, hayfields and pastures, in soil under cover – total, thous. tonnes

6. CROP GROWING

Agricultural land is land regularly used for obtaining agricultural products. It includes arable land, fallow land, land under permanent crops, and meadow land. Data are provided by the State Committee for Property of the Republic of Belarus.

Arable land is agricultural land regularly cultivated (plowed) and used under agricultural crops, including perennial grass with period of use specified by the scheme of crop rotation as well as emergency fields, soil area under cover (greenhouses), and clean fallow.

Land under permanent crops is land covered with artificial trees and shrubs (plantations) or plantations of herbaceous perennial plants, intended for fruit harvest, food, technical and medicinal plants, as well as for landscaping.

Sown area is a part of arable land under agricultural crops.

Gross harvest of agricultural crops is the output produced (harvested) from the total sown area under agricultural crops. Gross harvest of grains and legumes is measured in weight after treatment.

Yield capacity of agricultural crops is the average harvest of agricultural products per unit of actually harvested area (per hectare).

7. ANIMAL HUSBANDRY

Livestock and poultry population is the number of farm animals – cattle, pigs, sheep, goats, horses and others as well as poultry of all species.

Sales of livestock and poultry for slaughter (in live weight) are sales of all types of livestock and poultry for slaughter through various distribution channels – to meat processing organisations and cool storage facilities; subsidiary production units of organisations; consumers' cooperatives; distributed or sold through catering facilities; sold on the markets or through other distribution channels.

Production of milk is actually yielded milk, including milk consumed in the farms for their own needs. Milk suckled by calves in sucking maintenance is not included.

Average milk yield is calculated as a ratio of milk yielded from dairy heard cows to the average dairy herd population regardless of whether the cows milked or not in the reference period.

Production of eggs is eggs gathered from all kinds of farm poultry, including eggs used for poultry reproduction (incubation), production of egg powder, etc. as well as loss of eggs (breakage, spoilage, etc.)

7.1. Livestock population in farms of all types

(beginning of year; thousand heads)

8. FINANCIAL STANDING AND PRICES

Financial indicators are provided for agricultural organisations. Tables 8.1 and 8.2 include also data on small businesses and private farms.

Revenues from sales of products, goods, works and services are funds or other assets in monetary form received or receivable from sales of products, goods, works and services, in case of their recognition as a revenue in accordance with the legislation, for the main revenue-generating activity.

Net cost of products, goods, works and services sold means costs incurred to produce products, perform work and provide services related to the products, goods, works and services sold; sales costs, administrative expenses, and acquisition cost of goods sold.

Profit, loss (-) from sales of products, goods, works and services is the financial result from sales of products, goods, works and services defined as the difference between the sales revenues and net cost of products, goods, works and services sold and taxes and charges payable from revenues.

Profit, loss (-) before tax is the total financial result from operating, investment and financial activities.

Net profit, loss (-) is the final financial result of the company's activity for the reference period defined as a sum of profit (loss) from operating, investment and financial activities reduced by the sum of taxes and charges as well as sums payable from profit taking into account changes in deferred tax assets and liabilities.

Profitability of products, goods, works, and services sold is calculated as a ratio of profit from sales of products, goods, works and services to the net cost of products, goods, works and services sold. A negative financial result from sales of products, goods, works and services means operating at a loss.

Profitability of sales is calculated as a ratio of profit from sales of products, goods, works and services to the revenue from sales of products, goods, works and service. A negative financial result from sales of products, goods, works and services means operating at a loss.

A loss-making organisation is an organisation having net loss over the reference period.

Accounts payable are liabilities to suppliers and contractors for tangible assets received, works done and services provided; on advance payments received; with affiliated organisations, with personnel on wage payments, with budget and extrabudgetary funds, and other creditors.

Accounts receivable are liabilities of customers for goods, works and services; on bills of exchange received; of affiliated organisations, budget, personnel, and other debtors (including liabilities of accountable persons, advance payments granted to suppliers and contractors, and liabilities of other debtors).

Overdue indebtedness is debts that have not been repaid when due as specified by contracts and legislative acts.

Agricultural producer price index reflects changes in prices of agricultural products produced by domestic companies and sold in the domestic market, excluding value added tax and transportation, loading and unloading costs, but including bonuses and discounts for quality.

The state statistical observation of prices of agricultural producers is based on the sample of reference organisations in agriculture. The sample of reference agricultural organisations includes major agricultural producers which have a significant share in the sales of agricultural products and a definite specialty.

At present, the sample includes around 850 organisations. State sample statistical observation on agricultural producer prices covers more than 9 600 kinds of specific products.

The aggregated agricultural producer price index is calculated by economic activity as well as separately by product type (subtype). The aggregated agricultural producer price index is computed by regions and at the level of the country.

In order to eliminate the effects of structural changes in production and sales of agricultural products caused by biological and climatic factors, the average value of products sales for three years preceeding the reference year is taken as a base period.

Price parity index of industrial and agricultural products (price parity index of industrial products, works and services consumed by agricultural organisations and sold agricultural products) reflects the proportion between changes in prices of industrial products and services consumed in agricultural production, and prices of sold agricultural products. It is used to analyse trade conditions and to correct pricing policies in agriculture.

eggs	111.1	167.3	179.7	119.6	120.7	110.1

8.8. Price parity index of industrial and agricultural products

(as percentage of previous year)

	2010	2011	2012	2013	2014	2015
Price parity index of industrial and agricultural products	96.4	89.8	100.6	117.3	94.1	108.8

9. PROCESSING OF AGRICULTURAL PRODUCTS

Volume of industrial production is the total finished and semi-finished products manufactured, works performed and services provided by organisation and intended for sale to (custom-produced for) other organisations, population, non-industrial units of the same organisation classified according to the National Classification of Economic Activities in mining and quarrying, manufacturing, and production and distribution of electricity, gas and water.

The volume of industrial production do not include intrafactory turnover and is shown at actual selling (shipping) prices excluding taxes and charges payable from revenues and including the value of raw materials processed under contracts (unpaid by corporate manufacturer).

Intrafactory turnover is the value of that part of finished and semi-finished products manufactured by the organisation, which are used for own industrial needs within the organisation and the value of which is included in the net cost of final industrial products.

Raw materials processed under contracts are raw materials owned by a customer and passed for processing to other organisations to manufacture products under contracts concluded.

The data on the volume of industrial production for industry as a whole and by economic activity are provided in monetary terms as a sum of data on the volume of industrial production of legal entities (including small and micro entities) and their local kind-of-activity units regardless of the ownership, which are engaged in production of goods (works, services) in mining and quarrying, manufacturing, and production and distribution of electricity, gas and water.

Since 2013 the volume of production of food products, including beverages, and tobacco is provided taking into account the volume of production of individual entrepreneurs and households.

Industrial production index is a relative measure reflecting changes in the output in periods under comparison.

Industrial production index is calculated on the basis of the dynamics of production of the representative goods (services) in physical and (or) monetary terms with further gradual aggregation of individual indices into indices by economic activity and into the composite index for the industry as a whole. The calculation employs average annual prices of the base year. The structure of gross value added by economic activity for the base year is used as weights for aggregation. Change of the base year is taking place annually.

Industrial production in physical terms is generally measured by gross output, i.e. including products consumed for own industrial needs within the enterprise. The volume of production includes products manufactured both from own raw materials and from those supplied by customers.

9.1. Main indicators of organisations with economic activity in "Manufacture of food products, including beverages, and tobacco"

	2010	2011	2012	2013	2014	2015
Number of organisations ¹⁾	815	807	805	807	807	777
Volume of production of food products, including beverages, and tobacco						
bn. rubles	33 558	61 344	113 705	135 768	159 763	175 058
2010 = 100	100	108.7	113.6	115.5	113.8	112.4
previous year = 100	110.7	108.7	104.5	101.7	98.5	98.8
percentage share in total volume of industrial production	20.1	17.6	18.5	22.4	23.7	23.7
Average payroll number of employees, thous.	151.8	151.7	150.9	150.5	149.9	144.7
Nominal gross average monthly wages and salaries, thous. rubles	1 259.7	1 986.5	3 871.1	5 542.5	6 521.1	6 943.9
Utilization of capacity of industrial enterprises, percent:						
meat	74	71	70	76	74	73

11. FOOD BALANCE SHEETS

The section presents food balance sheets of selected agricultural products and per capita consumption of basic foodstuffs.

Food balance sheets is a system of statistical indicators which reflect the sources of basic agricultural products, raw supplies and food, and their utilisation. The balance sheets show the flows of products from their production to their final use and allow for the routine analysis of the correlation between the resources and their use as well as for the forecasting of trends on the food market.

The level of self-sufficiency in basic agricultural products reflects the extent to which domestic production is able to meet all the demands of the country and is measured as the percentage ratio of domestic production to domestic consumption. Domestic consumption includes personal consumption of population, industrial use and processing for non-food purposes, and losses.

11.1. Level of self-sufficiency in basic agricultural products (percent)

	2010	2011	2012	2013	2014	2015
Meat	118.3	118.8	128.4	132.6	126.0	133.1
Milk	199.4	177.9	195.1	201.1	211.8	227.0
Eggs	118.3	119.2	121.4	129.2	130.7	128.7
Fish	14.5	19.3	18.7	14.4	12.1	13.1
Potatoes	102.0	92.9	98.4	95.7	108.7	105.1
Vegetables and cucurbits	96.9	90.8	81.0	92.4	97.8	94.8
Fruits and berries	82.1	37.7	68.2	52.6	63.5	55.2

11.2. Supply and use of meat and meat products

(thousand tonnes)

	2010	2011	2012	2013	2014	2015
Supply						
Opening stock	69.4	62.0	58.1	75.0	68.9	54.7
Production ¹⁾	971.4	1 020.1	1 092.5	1 172.0	1 073.0	1 150.3
